

# OUTBOARD MOTOR DIMENSIONS

## OVERALL DIMENSION ITEMS

Symbol	Definition and Description
L1	Horizontal distance from datum point to rearmost point of power unit
L2	Horizontal distance from datum point to forefront (depends on the model) of power unit
L3	Distance from datum point to farthest point on tiller handle, when the handle is in horizontal position (in use)
L4	Horizontal distance from datum point to rearmost point of the lower case
L5	Minimum distance from transom board or its extension to forefront of the lower case, with motor fully trimmed down and steered to the full
L6	Horizontal distance from datum point to rearmost point of protrusion when motor is tilted up (over-tilt position)
L7	Horizontal distance from datum point to protruded forefront when motor is tilted up (over-tilt position)
L8	Horizontal distance from datum point to lowest point of protrusion when motor is tilted up (over-tilt position)
L9	Horizontal forward protrusion of lower case from the datum line when PTT is fully trimmed down
L10	Horizontal distance from datum point to bracket shaft (bolt) center
H1	Vertical distance from datum point to lowest point of motor
H2	Vertical distance from datum point to highest point of power head
H3	Vertical distance from anti-cavitation plate undersurface to the center of propeller shaft
H4	Vertical distance from datum point to anti-cavitation plate undersurface
H5	Vertical distance from datum point to tiller handle tip when the handle is in vertical position
H6	Vertical distance from skeg tip at H1 to the lowest point of lower unit when motor is tilted up (over-tilt position)
H7	Vertical distance from datum line to protruded forefront when motor is tilted up (over-tilt position)
H8	Vertical distance from datum line to lowest point of protrusion when motor is tilted up (over-tilt position)
H9	Vertical distance to the highest point of the motor when it is tilted up (over-tilt position)
H10	Vertical distance from datum point to bracket shaft (bolt) center
H11	Difference in the height of lower unit lowest point comparing to the height in the standard position and with PTT in the fully trimmed down position.
W1	Leftward protrusion from center line of motor body when looking at the front face
W2	Distance from tiller handle tip to centerline of motor body when looking at the front face
W3	Distance from centerline to left or right edge of motor body, except for levers and handles
W4	Distance from centerline to left or right end of motor body protrusion, except for levers and handles
W5	Distance from centerline to the farthest point on the body when steered to the maximum angle
W6	Distance from centerline to the farthest point on the tiller handle when steered to the maximum angle
A1	Maximum steering angle each way (symmetrical), from centerline of motor body
A2	Tilt up angle (whole rotating range to over-tilt angle including negative trim angle)
A3	Maximum negative trim angle from the vertical line through the datum point
T1	Centerline-to-centerline minimum distance of the engines in case of twin installation

# OUTBOARD MOTOR DIMENSIONS

## CLAMP BRACKET DIMENSION ITEMS

Symbol	Definition and Description
B1	Horizontal dimension from centerline of motor body to lower bracket mounting hole (slot)
B2	Vertical dimension from transom top to lower bracket mounting hole (slot)
B3	Horizontal dimension from centerline of motor body to the center of upper bracket mounting hole
B4	Vertical dimension from transom top to the center of upper bracket mounting hole
B5	Horizontal dimension from centerline of motor body to the point of largest width on the bracket
B6	Vertical dimension from transom top to lowest point on the bracket
B7	Horizontal dimension from centerline of motor body to the center of lower extra bracket mounting hole
B8	Vertical dimension from transom top to the center of extra hole at the lower part of bracket
B9	Dimensions between the upper bracket mounting bolts (when holes are at even intervals)
B10	Dimensions between the upper bracket mounting bolts (when holes are not at even intervals)
B11	Horizontal dimensions from centerline of motor body to the clamping bolt center
B12	Vertical dimensions from transom top to the clamping bolt center
B13	Mount flange thickness of clamp bracket
C1	Allowable transom board thickness when clamping screw is driven-in to the least extent
C2	Allowable transom board thickness when clamping screw is driven-in to the full extent
C3	Maximum allowable transom plate thickness for mounting the motor
D1	Diameter of bracket (main) lower mounting hole, or screw
D2	Diameter of bracket (main) mounting hole, or screw (lower mounting hole diameter, or, for slot, center-to-center distance of both end circles)
D3	Diameter of bracket mounting (sub) hole
D4	Diameter of central bracket mounting extra hole or the screw size
AN1	Vertical dimension from bottom of clamp bracket to the bottom end of anode
AN2	Horizontal dimension from centerline of motor (anode) to the point of largest width of anode
